

LONGEVITY
LIVE LONGER. LIVE BETTER.

To Whom It May Concern:

As a medical doctor, having been involved in the development and testing of magnesium sulfate crystals and spray, I have found no adverse reactions or contraindications using it with humans and or animals.

I attest that the products are composed of minerals and botanicals extracts, and are generally recognized as safe (GRAS).

Yours in Health,

Dr. Arthur Sumrall, M.A., M.D.

Medical Director of Elements Personal Care, Inc.
